

My Beamer Presentation

tomaz-suller

Your institute

26th March 2025

Hello, World!

This is markdown but it'll be compiled to \LaTeX

As you can see, you can use \LaTeX commands inside these slides too
(thanks `raw_tex!`)

So you get the best of both worlds!

A note: `rebase_relative_paths`

One of the options `pandoc.sh` passes to Pandoc ¹ is `rebase_relative_paths`, which makes Pandoc look for image paths *relative to the referenced file, not from where Pandoc was called*

This is neat because you can have multiple directories, each with their own `img` subdirectory. It also works better with auto-fill suggestions from text editors (like VS Code) which assume paths are relative to the file.

¹though you can always change it!

Example of adding an image

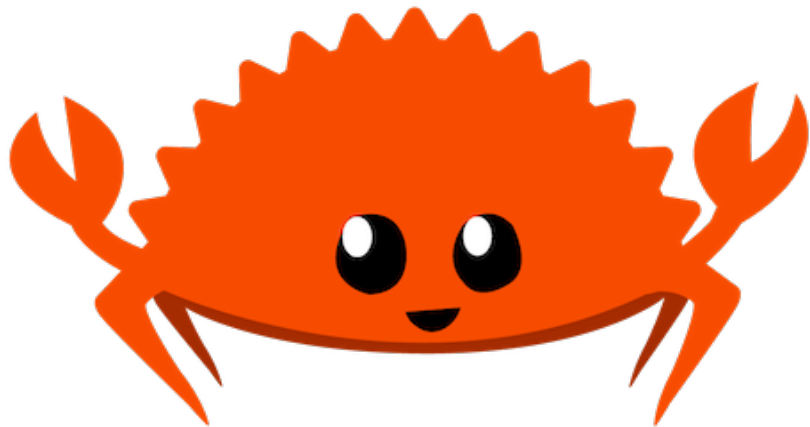

Figure 1: This is how you add an image
